PO BOX 3307
GETTYSBURG PA 17325-0307

PHONE: 717-334-6738
HOURS: MONDAY THROUGH FRIDAY FROM 7:30AM TO 3:00PM
<http://www.gettysburgma.com>

Account Number	11111-0
CID	22222
Name	Example Example
Service Address	601 E Middle Street
Billing Date	01/19/2024
Total Due	\$133.28

Calculate your Quarterly Water Usage:

1. Locate your Current Reading: **336**
2. Locate your Previous Reading: **331**
3. Meter readings are read in 100 cubic feet. The meter reading number furthest to the right equals 100cf. Therefore, you multiply the difference between the current reading less the previous reading by 100 to get your total usage amount in cubic feet.
4. Example: $336 - 331 = 5 \times 100 = 500$ cf of water usage

Meter	Meter Size	Previous Reading	Current Reading	Usage
33333333	5/8"	10/02/2023 331	01/02/2024 336	500

Water Service Charge:

- The Water Service Charge on your bill is a charge that all GMA customer's pay to be connected to our water system. It is governed by the size of the meter(s)

Water Usage Charge:

- The charge for all water usage
- Multiply Usage x Rate/100cf
- 100 cubic feet = 748 gallons of water

Sewer Charge:

- The sewer charge is based off of the current water usage reflected on the bill

Service Description	Charge
Previous Balance	131.77
Payments	-131.77
Adjustments	0.00
Water Service Charge	22.44
Water Usage Charge	23.10
Sewer	87.74
Current Charges	133.28
Total Due	\$133.28

Gettysburg Municipal Authority serves over 4,200 customers encompassing a large service area including Gettysburg Borough, portions of Cumberland and Straban Township. Some portions of our service areas require the water to be mechanically repumped. Additional expenses are incurred when water is required to be mechanically moved to these designated service areas but is required to ensure our customers receive the level of service they need. In order to ensure fair and equitable rates for all customers, as of January 1st, 2024, GMA has implemented a new water rate structure that includes a service charge and usage charge based on service location. There are two rate columns in the Schedule of Water Rates. The 1st column is GMA's standard rate. The 2nd column is GMA's repump rate for customers in mechanically repumped service areas.
